Common Cloud Deployment Mistakes

Cloud migration is fast becoming a top priority for small businesses and enterprises alike, as a strategy to improve efficiency, increase agility and unlock new opportunities. Many think that once they get past the internal debates, politics, and budget calculating, the hard part is behind them. Unfortunately, this is not necessarily true. Most companies make some basic mistakes and assumptions that cause their migration to the cloud to be significantly more difficult. On average, most migrations to the cloud don't go well.

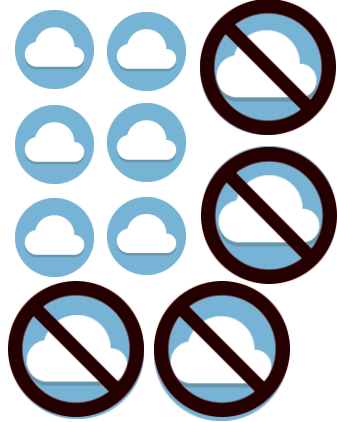

The Ugly Truth

70% CHANGE THE DESIGN DURING MIGRATION¹

MAKE ADJUSTMENTS WITHIN THE FIRST **SIX MONTHS**¹

43% FAILED OR STALLED¹

ALMOST **50%** REQUIRED AN INCREASE IN BUDGET WITHIN 6 MONTHS¹

Common Mistakes

1  ASSUMING THE NETWORK & SERVERS ARE RELIABLE

4 PUTTING HUMANS IN CHARGE OF LAUNCHING, SCALING AND MAINTAINING CLOUD SERVERS 

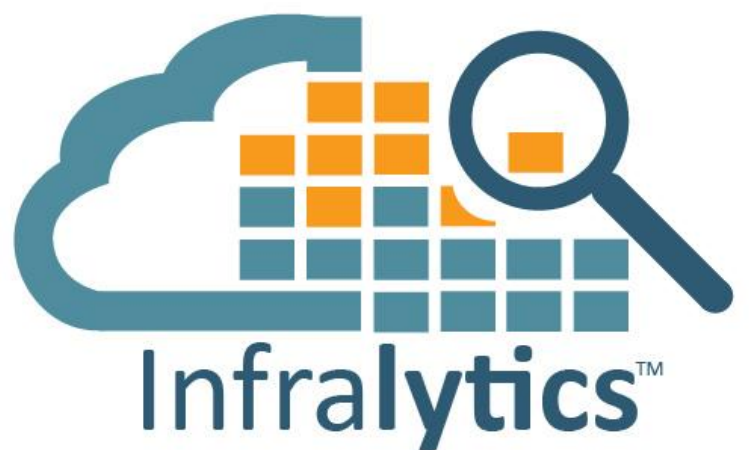

2 BELIEVING "THIS WILL BE EASY!" 

5  AVOIDING HYBRID CLOUD SOLUTIONS

3  ATTEMPTING AN ALL OR NOTHING DEPLOYMENT

The Answer

Infrastructure + Analytics =

KNOWLEDGE IS POWER

ENSURE YOUR CLOUD IS SECURE, EFFICIENT AND WORKING AT OPTIMAL PERFORMANCE FROM THE BEGINNING.

Infraalytics is a methodology developed by Flagship Solutions Group, provided as a service. We start by collecting data about your company's physical and virtual infrastructures, including data from servers, storage, networking, and software. We then analyze this data and present actionable insights to key stakeholders through customized, easy-to-understand dashboards. The more you know about your current and proposed environments, the better your chances of avoiding costly mistakes.

Flagship can also help facilitate the implementation phase of your cloud deployment utilizing industry best practices to ensure data integrity and effective connectivity.

FLAGSHIP SOLUTIONS GROUP IS YOUR SMARTER PARTNER™ PROVIDING SMARTER EVERYTHING THROUGH SMARTER DASHBOARDS

SIMPLY.
